INTRODUCTION

Data analyst with experience delivering end-to-end analytics and business intelligence projects using Power BI, Power Query and Excel. Skilled in transforming complex data into actionable insights while managing projects from requirements gathering and stakeholder engagement through development and delivery.

WORKING EXPERIENCES

Data Analyst - Global EHSS (Contract)
Green Plus Consultancy Sdn. Bhd. (serving Micron Technology)
Sep 2025 - Present

- Developed and maintained Power BI dashboards and analytical reporting solutions for Global EHSS, translating operational, safety, compliance and ticketing data into decision-support tools.
- Gather business requirements from global stakeholders and translate them into data models, KPIs, drill-down analysis and reporting logic.
- Connect and transform data from SQL databases, Sharepoint Lists, Excel, Qualtrics, Jira and external APIs to support end-to-end reporting workflows,
- Collaborate cross-functionally with business SMEs, program managers, data architects and database administrators from requirements gathering through development, UAT, deployment and ongoing enhancement.
- Perform data validation, reconciliation and root-cause investigation when discrepancies occur between source systems, databases and dashboards.

Sales Advisor
Proton Atiara Johan Group
Nov 2024 - Sep 2025

- Managed the full sales cycle from initial inquiry to final sale, including test drives, negotiations, trade-in evaluations, and financing options.
- Delivered excellent customer service by understanding client needs and providing tailored vehicle recommendations based on budget, lifestyle, and preferences.
- Maintained in-depth knowledge of the latest vehicle models, features, specifications, and pricing to effectively assist customers in making informed purchase decisions.

Self-employed Barista
Marie Coffee
Jun 2024 - Sep 2025

- Launched and managed daily operations of a small coffee stall business, overseeing end-to-end responsibilities including inventory management, customer service, and financial tracking.
- Collected and analyzed daily sales, customer preferences, and inventory data to identify trends, optimize stock levels, and improve profit margins.
- Forecasted inventory needs based on historical sales data and seasonal demand, reducing waste and stockouts.

Data Analyst (GEES- Protege)
PETRONAS Digital Sdn. Bhd.
Apr 2023 - Apr 2024

- Assigned to the Cybersecurity Department under Design, Validation and

	Assurance team to identify systemic security gaps and support the mitigation of security vulnerabilities in compliance with NIST guidelines. ● Designed and implemented an interactive Power BI dashboard to aggregate and visualize weekly cybersecurity metrics across PETRONAS subsidiaries, integrating multiple data sources and optimizing DAX queries for performance and scalability. ● Engaged with a vendor company to explore data structure and data accessibility design before migrating the data to a new proposed Cyber Security System. ● Conducted User Acceptance Testing (UAT) to verify data accuracy and ensure that the design aligns with the intended user experience, resulting in a seamless and user-friendly interface.	
	Sales Advisor **Al-Futtaim Group (Marks & Spencer)** ● Ensured products shelves are well-arranged and adequately stocked with products. ● Handled discounts, price changes and customer returns accordingly. ● Maintained an in-depth knowledge of store products to provide suitable recommendations to customers as needed.	Jan 2022 - Apr 2023
	Research Assistant Intern **Malaysian Nuclear Agency** ● Conducted a project titled “Correlation of Ground Penetrating Radar and Nuclear Density Gauge Data to Determine the Density of Asphalt Pavement”. ● Published the project paper to IOP Conference Series: Materials Science and Engineering. ● Consisted of teamwork, excellent communication and technical skills integration between devices hardware and data analysing software namely Microsoft Excel and RADAN7	Mar 2021 - Aug 2021

ACHIEVEMENTS

Behavioral Safety Audit (BSA) Dashboard (Micron Technology)
- Developed and launched a global BSA dashboard featuring Root-Cause Trends, Top 3 Unsafe Response Analysis and Site-level Behavioural Insights.
- Improving visibility into audit execution and enabling targeted, data-driven safety interventions.

Sustainability Operation Dashboard (Micron Technology)
- Developed Power BI reporting for 15 sustainability metrics using a Sharepoint-based data collection model.
- Supporting monthly site reporting, central data validation and structured sustainability KPIs monitoring.

EHSS Ticketing System AI Modernization (Micron Technology)
- Modernize the Global EHSS ticketing ecosystem by integrating Microsoft Copilot Studio with Sharepoint and Power BI to create an AI-assisted service experience for conversational request intake, classification and triage.
- Reducing administrative effort while preserving governance and reporting visibility.

EDUCATION

Bachelor of Science (Nuclear Science) **Universiti Kebangsaan Malaysia (UKM)** CGPA: 3.24	Sep 2017- Aug 2021

CERTIFICATION

Google Data Analytics Professional Certificate Coursera	Dec 2024
Google Cloud Fundamentals: Core Infrastructure Fusionex Academy	Jun 2023
Google Cloud Big Data & Machine Learning Fundamentals Fusionex Academy	Jun 2023

LEADERSHIP EXPERIENCES

International Nuclear Science, Technology and Engineering Conference 2019 (iNUSTEC 2019)
Marketing Executive Committee
Established partnerships with several local universities and organizations, including ASME, NESS, and INE, to support the implementation of this programme.

10th International Conference on Isotopes 2020
Presenter
Delivered a presentation on the research study titled 'Application of Nuclear Security Methodology in the Development of a Physical Protection System'.
